DETAILED ACTION

Claim Objections

1. Claim 5 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim *should refer to other claims in the alternative only*. See MPEP § 608.01(n). Accordingly, the claim 5, which doesn't clearly refer to the claims in the alternative, has not been further treated on the merits.

Allowable Subject Matter

2. Claims 1-4, 6-8 are allowed.

The following is an examiner's statement of reasons for allowance: While Igarashi et al (31.2: Proposal of the perceptive parameter motion picture response type) the revised N-BEW parameter, that quantifies the MPRT performance wherein the N-BEW unifies three visual points) The widening of brightness transitions due to a motion (motion blur) (see figure 1), the brightness time response dependence on a brightness level and the brightness level measurement (section 2.1) Yasuhiro et al (JP 6038247) teaches capturing of images of both scrolled and still test pattern (see figure 3) but the still images in figure 3 are not used to estimate the velocity of the test pattern. None teaches *estimating the moving velocity of the scrolled test pattern based upon the second blurred edge width and the exposure time of the image sensor at which the image of the still test pattern was captured, and normalizing the first blurred edge width by using the estimated moving velocity of the scrolled test pattern*. The Examiner finds no reason or motivation to combine the above references in an obviousness rejection thus placing the application in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
